

AstroMini by Astro Packaging

Portable Applicator Gun

AstroMini is a small, hand-held hotmelt adhesive applicator. Replace staples, tape, cold glue, shrink wrap and strap methods using the AstroMini. Enjoy fast and reliable bonding of leather, wood, cardboard, ceramics, rubber, plastic, carpet, textiles and most other materials.

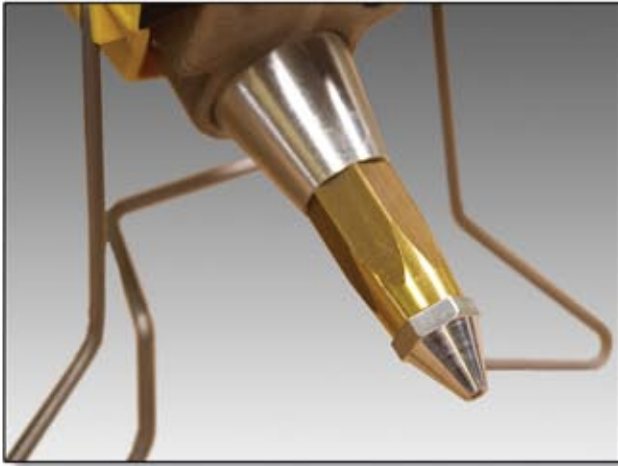

The small reservoir system is larger and more efficient than stick guns yet smaller than more expensive tank systems. The reservoir holds 7 oz. (0.2 kg) of hot melt adhesive and is capable of dispensing up to 4 oz. (0.113 kg) per minute.

AstroMini is the perfect substitute for messy stick and slug glue guns. The design is portable, stands on the work surface, and is easy to handle. Its clean, quiet operation makes it suitable for office and light industrial environments. Save money on adhesive with the AstroMini which accepts bulk hot melt in granule, chiclet or pillow form. Packaging grade or pressure sensitive hot-melt can be used in this versatile, trigger-operated hot melt applicator. Operating the AstroMini is easy. Simply plug it into an electrical outlet and fill the tank with hot melt. After a 10 to 15 minute warm-up, pull the trigger for a smooth, even flow of adhesive. An adjustable thermostat controls the heater temperature. The AstroMini comes standard with a tapered, extended 0.070 in, (1.8 mm) orifice nozzle. A variety of dispensing nozzles are available.
