We have the correct system for you. Astro Packaging offers three different sized machines for applying hotmelt butyl.

### D2-15-B

The D2-15-B hotmelt butyl system is designed for hotmelt "slabs" or "chunks." This extremely reliable hotmelt unit holds 20 pounds and will pump 180 inches of 1/2 inch bead per minute. The cylindrical tank design virtually eliminates any possibility of char build up, and is easily filled or cleaned.

Starting at \$4950

### TOF-20A

The TOF-20A unit is designed to pump hotmelt butyl out of 5 gallon pails. The melt/pump rates are 60% higher than competitors, and it has highly accurate temperature control and is manufactured to precise industry specifications and is comprised of the highest quality materials for long-lasting and extended life.

Starting at \$16,500

### TOF-200A

The TOF-200A unit pumps hotmelt butyl out of 55 gallon drums. The mega-flo high melt rate platen reduces material loss. The hotmelt unit is available as a tandem system for uninterrupted supply to high production applications.

Starting at \$31,700
