

D2-15 HOT MELT SYSTEM

The D2-15 hot melt adhesive unit is designed with a constant speed direct drive motor/pump combination and adjustable output control. This extremely reliable melt unit holds 15Lbs. of adhesive. The cylindrical tank design virtually eliminates any possibility of char build up with an integrated melt fin design to insure consistent pump rates due to the flow through grid design. Capable of 2 hose and 2 applicators, the D2-15 temperature control is simple to operate. Features include alarm settings to ensure all zones are running properly.
