

Astro Packaging & Adhesives

For over 40 years, Astro Packaging has proudly manufactured reliable & durable hot melt equipment **made in the United States!** Each machine is backed with a **one-year warranty** and is designed to provide high-performance solutions. Our factory-trained technicians offer **24/7 technical support** in both English and Spanish. **Call or visit us online to shop our full line of melt units, industrial adhesives, and custom configured systems!**

LS10 Melt Unit

All electric, ready-to-run plug and play manual hot melt unit.

SS10 Melt Unit

2 hose capable 10 lb. melt unit for manual bead/spray applications.

D2-15 Melt Unit

Durable melt unit for automatic or manual bead or spray applications.

AP Series Melt Units

Plug-and-Play replacement melt unit for Nordson ProBlue and DuraBlue Series.

Nordson ProBlue Series

New or reconditioned ProBlue melt units available at Astro Packaging.

Nordson DuraBlue Series

New or reconditioned DuraBlue melt units available at Astro Packaging.

Graco InvisiPac

Tank-less melting system with line-site and robust diagnostics.

Graco Therm-O-Flow Series

The ultimate bulk hot melt system for low and high flow settings.

ITW Dynatec Simplicity

Piston pump replacement unit compatible with Nordson external parts.

Slautterback Legacy

The Slautterback legacy now manufactured by Astro Packaging. Get the same Slautterback reliability and durability from Astro Packaging hot melt units.

Made With Pride In The U.S.A.

Tank Cleaning & Service Kit

Everything you need to make your machine perform like new again!

Astro Packaging's tank cleaning and service kit includes everything you need to flush and clean your hot melt system to help maximize the performance and lifetime of your equipment – even a 5 gal. sealable bucket for simple disposal!

Flushing solutions help remove dirt and charred material that can plug nozzles and clog the melters, leading to downtime and poor system performance. Astro Packaging recommends quarterly maintenance programs and should also be done any time there is a change in adhesive material.

TANK CLEANING OPTIONS

Astro #	Description	Price
79600	Cleaning Kit, Complete System Flush	\$226.00
P8200-1	Hot Melt Purge, 1 Gal	\$109.00

QUICK, EASY, HOT MELT PURGE

P8200 is a specially formulated product designed to protect hot melt equipment from premature failure. Additionally, P8200 reduces costly downtime by purging unwanted char, as well as degraded and cross-linked adhesive from the entire hot melt system.

P8200 Prevents:

- Char build-up
- Nozzle clogs
- Erratic pump operation
- Sticky Valves
- Hose constrictions
- Binding of applicator wheels/needles

P8200 Promotes:

- Longer machinery life
- Less down time
- Cleaner hot melt systems

Available in Three Sizes:

- 1 Gallon
- 2.5 Gallons
- 5 Gallons
